

ECOLITE hole punch location

ECOLITE ISO cards are punch-able on either of the short sides. There are no markings indicating the punch locations on the cards.

The cards can be punched on either of the short sides, 27mm in from either long side and 2mm in from the short side.

The maximum punch dimensions are 1.5mm by 8mm with the long edge of the hole parallel to the edge of the card being punched.

Punch Locations

Punch Dimensions

Caution: Holes punched in the wrong location may damage the antenna within the ECOLITE cards and affect card performance. Care should be taken to punch holes only at the described location and within the punch dimensions. Punching a hole of the correct dimensions in the correct location will not impact on the ECOLITE cards warranty.
